Nationality: Bulgarian | **Email address:** shinni@tutamail.com | **Website:** https://shinni.dev |

Address: Heerlen, Netherlands (Home)

ABOUT ME

First-year HBO-ICT Infrastructure student at Fontys in Eindhoven, living in Heerlen. Next to my studies I run my own Proxmox home server with around 10 services (mail, cloud storage, password manager, media, monitoring) and a segmented OpenWrt network, which I set up, secure and maintain myself.
I like automating things and use AI tools such as Claude Code to build scripts and solve problems faster, and I always test what I run. Before moving to the Netherlands I worked about 11 months in customer service on an airline account at Alorica, where I moved from phone to chat support.
Languages: Bulgarian (native) and English. Portfolio: shinni.dev

EDUCATION AND TRAINING

15/09/2018 – 23/05/2024 Sofia, Bulgaria

HIGH SCHOOL DIPLOMA Ваня Войнова 132 СУ

Specialisation: Hardware and Software Science. Final grade: 5.43 / 6.

Level in EQF EQF level 4

01/09/2026 – CURRENT Eindhoven, Netherlands

BACHELOR OF SCIENCE IN ICT (HBO-ICT), INFRASTRUCTURE Fontys University of Applied Sciences – Fontys ICT

Four-year bachelor's programme in ICT with a focus on IT infrastructure, taught through practice-based projects with real clients.

- Network design and administration
- Linux and Windows server administration
- Virtualisation and cloud infrastructure
- IT security fundamentals
- Automation and scripting
- Working in project teams using agile methods

Level in EQF EQF level 6

WORK EXPERIENCE

CUSTOMER SERVICE REPRESENTATIVE – ALORICA – 02/08/2025 – 30/06/2026 – SOFIA, BULGARIA

PROJECTS

CURRENT

Self-hosted home server and network (Proxmox homelab)

I designed, built and run my own home server and network, and keep documentation and a changelog for every change.

- **Virtualisation:** Proxmox VE on Debian with 10 LXC containers plus Docker workloads, LVM/ZFS storage, NVIDIA GPU passthrough for hardware video transcoding
- **Services:** Nextcloud with Collabora, Mailcow mail server, Vaultwarden password manager, Jellyfin media server, web hosting, Discord bots and game servers
- **Networking:** OpenWrt router with VLANs and a firewalled DMZ, isolated guest WiFi (WPA3), AdGuard Home DNS, SQM/QoS, port forwarding, Caddy reverse proxy with automatic SSL, Cloudflare DDNS

- **Security:** remote management only through Tailscale, locked-down host firewall, fail2ban, banIP, ClamAV, Lynis audits and CVE checks
- **Monitoring and automation:** Beszel monitoring with ntfy alerts, scheduled backups, automated updates for all containers, and my own scripts: a WAN monitor that logs packet loss and incidents, a network change script with automatic rollback, and a server status tool

SKILLS

Linux & servers

Proxmox VE | Linux (Debian) | LXC containers | Docker | ZFS / LVM storage | Bash scripting | GPU passthrough

Networking

OpenWrt | VLANs | Firewalls and DMZ | DNS (AdGuard Home) | Caddy reverse proxy and SSL | Tailscale VPN | QoS / SQM

Security & operations

fail2ban | Lynis hardening | CVE checks | Backups | Monitoring (Beszel, ntfy) | Technical documentation

Development & automation

JavaScript | Node.js | Express | MongoDB | REST APIs | Git | AI tools (Claude Code) for scripting and troubleshooting

Customer service & teamwork

Customer service (phone and chat) | Fast and accurate typing | Problem solving | Teamwork

DIGITAL SKILLS TEST RESULTS

Information and data literacy	**ADVANCED**	Level 6 / 6
Communication and collaboration	**ADVANCED**	Level 6 / 6
Digital content creation	**ADVANCED**	Level 6 / 6
Safety	**ADVANCED**	Level 6 / 6
Problem solving	**ADVANCED**	Level 6 / 6

Results from a self-assessment based on The Digital Competence Framework 2.1

LANGUAGE SKILLS

Mother tongue(s): **BULGARIAN**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	C1	B1	B2	B2	B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

CERTIFICATIONS

SoftUni, 18/02/2025

JS Advanced

Advanced JavaScript course (31.5 hours) covering core language concepts and object-oriented programming. Topics included syntax and functions, arrays and nested arrays, objects and composition, DOM manipulation and event handling, advanced functions, classes, prototypes and inheritance, and unit testing with error handling. Completed with the maximum grade.

Mode of learning: Online

SoftUni, 07/04/2025

JS Applications

Course (28 hours) on building client-side web applications that communicate with remote services. Topics included HTTP and REST services, asynchronous programming, remote data and authentication, single page applications, client-side rendering, routing, modular application architecture, and testing. Completed with the maximum grade.

Mode of learning: Online
